# CUTTING & STRIPPING (UNISTRIP-999+)

Sai Paradise Machine Tools

Overview

The Power Unistrip – 999+ processes round cables upto 8 mm outer dia. And processes 2 core, 3 core flat and round cables with pull-off lengths upto 100mm on the right end (leading end) and 40mm on the left end (trailing end). This Unistrip – 999 has a powerful cutting and transport drives fro higher production rates. It has a program memory capacity of upto 200 wires with all the processing parameters. This Unistrip-999 is designed in PLC based with servo motors and HMI.

Features

1. Quick change guide tubes and blades
2. Simple operation of HMI (Touch Screen)
3. User-friendly operation
4. Quick programming
5. Mid-strip facility available (optaional)

Applications

Uni Strip – 999+ is widely used in PVC, Teflon, Silicon, fiber glass single & multi core cables processing applications.

Technical Details

Operating interphase	HMI (Touch Screen)
Wire Type	PVC, PE, Teflon, Silicon and other plastic wires
Minimum cable size	1.0 sqmm
Maximum cable size	16.0 sq mm
Cable Outer Dia	2.0 mm to 12mm
Lead Stripping Length	100 mm
Tail Stripping Length	50 mm
Feed System	Belt Drive
Length Accuracy	±0.1mm (L x 0.02%) Depends on the materials
Programme memory capacity	Upto 99 no's with all processing parameters
Noise Level	< 70 db
Power Supply	230 to 240V (50/60 Hz)
Motor	1.3 KWatts
Dimensions (L x W x H)	550 x 520 x 370 mm
Net Weight	72 kgs
