

# HYDRALIC CRIMPING (HCM – 20000)

## *Sai Paradise Machine Tools*

### Overview

Hydraulic Crimping – HCM 20000 is a Hydro Electric terminal machine, it can crimp 1 – 100 sqmm wire terminal riveting pressure, the whole machine is controlled by hydraulic, the mould is replaced fast and the speed is stable, it can be matched to various cables. The operation is simple and it is easy to maintain, the machine is designed for high output low maintenance manufactures to save the cost of the malfunction, beautiful and elegant appearance make the factory more noble and advanced.

It is adopted by high-tech frequency conversion technology, accurately positioning by electron and it has function of holding pressure when crimping. It is smaller, more save on power and easier to replace the mould than the traditional hydraulic machine.

### Features

1. The whole machine is controlled by hydraulic
2. It can be matched to various cables
3. The operation is simple and it is easy to maintain
4. It can finish to 1-100 sqmm wire terminal riveting pressure

### Applications

It is used in Wire harness industries, Automobile industries, Home appliance industries, Control panel manufacturing industries.

## Technical Details

---

Capacity	30000 Kgs
Itinerary	500 mm (Adjustable)
Electric Source	AC 220V/50 Hz-60Hz
Volume	600 x 280 x 600mm
Net Weight	75 Kgs
