

# TAPING MACHINE – (HT – 20)

## Sai Paradise Machine Tools

### Overview

This Model is suitable for wire harness taping, working speed is adjustable, taping cycles can be set. Apply to different kinds of non – insulation tape material, such as duct tape, PVC tape, etc. Winding effect is smooth and no folding. Make sure the tape on each lap winding with a circle of overlapping ½ covered. Easy to switch between different winding modes.

This machine can realized different taping method, for example, same position with point winding, different positions with straight spiral winding. The machine also has counter which can record the working quantity. It can replace manual work and improve taping performance.

### Features

1. The operator can operate quickly and efficiently
2. Low noise level
3. Minimum maintenance
4. Increases productivity
5. User friendly

### Applications

It is used in wire harness manufacturing industry, Electrical industry, Wire or cable manufacturing industry.

### Technical Details

Operating Interphase	PLC With HMI (Touch Screen)
Wire Type	PVC, Silicon wires etc.,
Available tap width	2 – 30 mm
Available wire diameter	2 – 30 mm
Noise Level	< 50 db
Speed	0-600 mm/s
Power Supply	220V (50 Hz)
Motor	200 w
Dimensions (L x W x H)	300 x 350 x 425 mm
Net Weight	20 Kgs
